Medical Troops, AFWESPAC	13

Notes and Definitions

Abbreviations:

WIA - Wounded in Action
IIA - Injured in Action
N-B Injury - Non-battle Injury
CRD - Common Respiratory Diseases
N-P Diseases - Neuropsychiatric Diseases

Annual Rates per Thousand:

Rates in the form of "annual rates per thousand men" are conventionally used in medical statistics and reporting. They serve the purpose of basing observations on a common time-period. Most annual rates in this report are based on observation of a month-long period; such rates can be converted to rough percentages for the month by dividing them by 120.

Crude Death Rates:

This term applies to deaths from all causes among the entire army in the theater, as distinct from death rates specific for cause, age, risk, and so on.

HEALTH OF U. S. ARMY TROOPS IN SWPA

JUNE 1945

1. NON-EFFECTIVENESS

The mean non-effective rate for May was 60.4 per 1000 strength as compared with a rate of 58.2 for April. Roughly one-sixth of the total non-effectiveness during May represents the accumulation of days lost by patients who sustained a battle wound or injury during the Philippine Campaign. It is also of interest to note that non-effectiveness due to venereal disease infections and infectious hepatitis increased markedly during May.

2. ADMISSIONS TO SICK REPORT

The rate for admissions to sick report for May increased by about 5% over that reported in April. This was due to an increase in the admission rates for nonbattle causes. Marked increases were observed in the admission rates for venereal disease and infectious hepatitis.

3. DEATHS

The crude death rate for May was approximately 10% lower than that reported for April. This decrease reflects in the main curtailed combat activity with resulting decline in the number of troops killed in action and dying of wounds. No significant changes occurred in the May death rate from nonbattle causes. There appears to be an upward trend in the death rate associated with motor vehicle accidents.

4. EVACUATIONS

A total of 7333 patients were evacuated to the United States during June. The evacuation rate is considerably below the peak rate for April but only 5% below the rate for May. No significant changes were observed in the rates of evacuation for selected causes. Of the total evacuations, 22% or 1600 patients were evacuated by air; the remaining 6733 patients were evacuated by ship.

There were 2449 patients awaiting evacuation at the end of June. The estimated available lift for July is as follows: 13000 patient accommodations by heavy shipping (of these, 8750 are troop class accommodations); 1750 patient accommodations by air. Considering the type and quantity of the available lift for July and the number of patients boarded at the end of the month when shipping is not available, it is expected that approximately 1500 patients requiring ship accommodations and 150 patients requiring air evacuation would be awaiting evacuation on 1 August.

5. HOSPITAL BEDS

A total of 67250 beds, 56500 beds in fixed hospitals and 10750 beds in nonfixed hospitals, were present in the SWPA as of 29 June. Of the 56500 fixed beds, 31350 were actually operating, 5850 were staging, 2200 were under movement orders, and 9400 were under construction. There were 30737 patients occupying beds in fixed hospitals as of 29 June.

6. AVERAGE DAYS OF HOSPITALIZATION

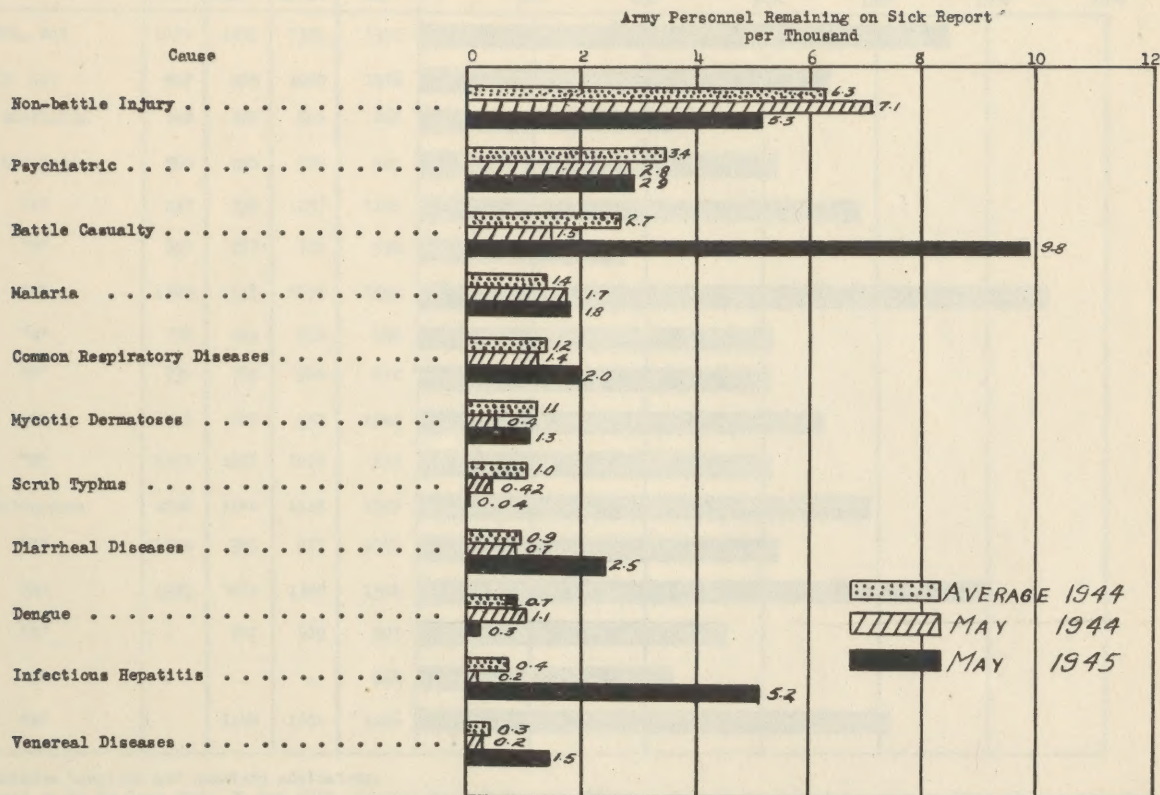

The average stay in all hospitals for patients discharged to duty from AFWESPAC hospitals during May was 21 days. Prior to boarding for evacuation to the United States, patients boarded in May and June were hospitalized on an average of 29 and 28 days, respectively. Patients evacuated to the United States during May and June spent on the average only 11 days in the hospital after they were boarded for evacuation.

DENTAL SERVICE ACCOMPLISHED BY THE ARMY DENTAL CORPS IN THE S.W.P.A.

FOR THE MONTH OF MAY.

<u>Absolute numbers and rates per thousand.</u>			<u>*786,505</u>
<u>Type of Service</u>	<u>Number</u>	<u>Rate per thousand per annum</u>	<u>Rate per thousand per month</u>
Admissions	79,296	1209.8	100.8
Sittings	164,305	2506.9	208.9
**Permanent Restorations	95,178	1452.2	121.0
Extractions	20,756	316.7	26.3
Teeth Replaced	27,887	425.5	35.5
Dentures Constructed	3,702	56.5	4.7
Dentures Repaired (Including Rebase)	2,025	30.9	2.6
Bridges Constructed	467	7.1	0.6
Prophylaxis	15,251	232.7	19.4

**Includes fillings, crowns, root canals, inlay recemented and Crown recemented.

The number of Dental Officers reporting the above Dental Service for the month of May was 870 with the ratio of total Dental Officers to the total strength being 1.2 per 1000 men, or one dentist for every 854.9 men.

The admission rate for Stomatitis, Vincent's, during May was 8.7 per 1000 per annum or 0.7 per 1000 for the month, a decrease from preceding month.

For every tooth extracted, 1.3 were replaced by dentures or bridges, indicating that 30% more teeth were replaced than extracted. The average number of teeth replaced by each partial denture constructed was 9.2. During the month 600 defective bridges were repaired or recemented. For each tooth extracted there were 4.6 permanent restorations, (fillings, etc) inserted. The average number of permanent restorations per reporting Dental Officer was 109.4. The average number of teeth extracted per reporting Dental Officer was 23.9. For the Amalgam restorations, 30.5% were Oxyphosphate and Amalgam. Of the Silicate restorations, 3.4% were Oxyphosphate and Silicate.

All the above ratings were computed on the basis of the Mean Strength of May 1945.

*As of: 8 June 1945. 93.62% of Station List.
